

## FAQs - Body Armor Recycling & Disposal

### What are your fees for body armor recycling, Kevlar recycling and destruction?

There are NO FEES for our service.

### What happens to the recycled body armor?

The material recovered during the recycling process will be used to manufacture an assortment of non-ballistic products including tires, tennis rackets, hockey sticks, snowboards, brake pad, jet engine enclosures, optical fiber cable systems, rope, flame resistant and heat protective clothing and helmets.

### What documentation will be provided to us?

We provided a chain of custody form for you to fill out and provide with your shipment. Once the body armor is processed you will receive a Certificate of Destruction and Recycling.

### Do you sell used body armor?

We do NOT sell any body armor. Our body armor disposal business is solely destruction, recycling and material recovery.

### What is the life cycle of body armor?

Most of the body armor manufactured in the U.S. has a 5 year warranty expiration. Depending on the use and condition of the vest the life cycle may be shorter.

### What materials are used to make body armor bullet resistant?
