

## Transitional Settlement District

### CHARACTER

The Transitional Settlement District is primarily located outside of the Kyle corporate limits, in an area of the city not serviced by Kyle water and wastewater service. The district should provide an area for low-density housing in the suburban built form, serviced by private waste water treatment plants, while still preserving its rural landscape heritage. This area of Kyle has received relatively little development pressure to date, due in large part to the increased development costs associated with establishing all new infrastructure. Kyle must be prepared to guide and direct development to the extent possible through the management of land divisions and enabling private waste water treatment facilities.

### INTENT

Close to I-35 and generally well-served by east-west roads (Windy Hill Road/County Road 131) and north-south roads (FM 2001), the District is not yet suited to accommodate commercial and industrial uses, at least those that are high water users or high waste water producers. The intention of this district is to assemble large acreage tracts of land for suburban-form neighborhoods, utilizing best management practices of low-impact development and particular sensitivity to the lack of public infrastructure to service the district. Opportunities should be provided for single family residential housing in close proximity to transportation corridors, thereby reducing travel demand on local streets, while still creating affordable housing solutions. The District should be designed to capture regional employment-oriented development opportunities associated with growth toward Hwy 21, SH 45, and SH 130 wherever possible. These employment opportunities must transition to the surrounding residential land uses, both within and outside of the District, in order to prevent conflict with the surrounding community fabric and preclude the continued growth of residential land uses.

### JURISDICTION

The Transitional Settlement District is located in the northeastern corner of Kyle, where it will be easily accessible by arterial highways and secondary county roads, and at least partially supported by development from Buda and Austin to the north. Figure 14 indicates the location of the Transitional Settlement District.
