Adoption of the 2015 International Codes and 2014 National Electrical Code

- International Building Code (IBC)
- International Existing Building Code (IEBC)
- International Residential Code (IRC)
- International Fire Code (IFC) with Local Amendments
- International Energy Conservation Code (IECC)
- International Plumbing Code (IPC)
- International Mechanical Code (IMC)
- International Fuel Gas Code (IFGC)
- International Property Maintenance Code (IPMC)
- International Swimming Pool and Spa Code (ISPSC)
- 2014 National Electrical Code (NEC)

Adoption of the 2015 International Code and 2014 National Electrical Code

• International Building Code (IBC)

Provides minimum requirements to safeguard the public health, safety and general welfare of the occupants of new and existing buildings and structures.

•International Existing Building Code (IEBC)

Provides basic levels for fire prevention, structural and life safety features of existing buildings without full compliance with new construction requirements contained in the other International Codes.

•International Residential Code for One and Two-Family Dwellings (IRC)

Regulates the construction of single-family houses, two-family houses (duplexes) and buildings consisting of three or more townhouse units.

• International Fire Code (IFC) with Local Amendments

Regulates minimum fire safety requirements for new and existing buildings, facilities, storage and processes.

•International Energy Conservation Code (IECC)

Promotes commercial and residential energy conservation through the use of new materials and techniques in building design, mechanical systems and lighting systems.

Adoption of the 2015 International Codes and 2014 National Electrical Code

• International Plumbing Code (IPC)

Regulates the design and installation methods for water supply, sanitary drainage, and storm drainage to protect public health and safety in buildings.

•International Mechanical Code (IMC)

Regulates the design and installation of mechanical systems to protect life and property from the potential dangers associated with installation and operation.

•International Fuel Gas Code (IFGC)

Addresses the design and installation of fuel gas systems and gas-fired appliances, based on the most current information and technology.

•International Property Maintenance Code (IPMC)

Establishes minimum maintenance standards for basic equipment, lighting, ventilation, heating, sanitation and fire safety in existing residential and nonresidential structures.

•International Swimming Pool and Spa Code (ISPSC)

Regulates the minimum requirements for the design, construction, alteration, repair and maintenance of swimming pools, spas and hot tubs.

• National Electrical Code (NEC)

Covers the latest requirements on electrical wiring and equipment installations to protect people and property from electrical hazards in commercial, residential, and industrial occupancies.
