To whom it may concern,

Regarding the proposed Zoning for RV usage on Dacy Lane, there are life safety concerns. This area is a downstream drainage from the apartments and mobile homes on Bebee to the Northwest, as well as the hospital and commercial regions to the Southwest which have large amounts of impervious cover that create extra run-off. The prospective site is known for flooding and is within the 100 Year Flood Plan. That being said, the propensity for erratic water behavior and risk of flooding would create a high risk for life safety to residents occupying that acreage, to firefighters, other first responders and rescue workers. Please consider this for zoning purposes.

Thank you,

Inspector Marcus Peterson
Kyle Fire Department
