Dear P&Z Committee Members and Staff,

My name is Paul Scheibmeir and I am a registered professional engineer in Texas, California and Tennessee. I saw the notice that came with the water bill this month indicating there were some open seats on the P&Z Committee. When I clicked the link on the City website, the positions were not listed. I am writing to find out if these positions are still open. I am interested in one of those open positions if they are still available.

I have been involved in facilities engineering and facilities management for the majority of my professional career. The past four years I have been, and continue to be, the engineering manager for a speciality construction contractor that specializes in high technology construction projects. I have a considerable amount of experience in the planning and design of facilities and infrastructure systems that use hazardous materials and are heavy consumers of utilities such as water, waste water and electricity.

I have been a citizen of Kyle for the past 11 years and have no plans to leave. I would like to help Kyle make smart decisions as we continue to grow. As a professional engineer and one who has worked with facilities infrastructure most of my career, I have some experience with building, fire, mechanical, plumbing and electrical code as well as some of the NFPA codes.

I think I could be a useful addition to the P&Z Committee. Please let me know if the vacancies are still open and how to apply.

Regards,

Paul Scheibmeir, P.E.
